Change Log

Version	Date	File	Description	Details
v1.1	22 May 2021	Input parameter, Model documentation	Updated transition rates	Update allows for the natural history component to more accurately reflect a small subset of subjects with rapidly progressing lesions
		R Source code	Removed preclinical tunnel states	Update reflects change to input parameters and improves model runtime
		R Source code	Updated maximal number of model cycles	Update allows to model populations with starting age 45
		R Source code	Removed direct advanced adenoma - symptomatic cancer pathway	Removed unused structural parameters for more concise coding
